

Dpp1 / Cape Fire™

- Red blush, high-colour, attractive mutation of the Forelle pear varietal
- The appealing colour of this variety puts it in very high demand in the market
- Eating characteristics are sweet and crisp
- Good producing variety
- Excellent long-term storage capabilities
- Harvest very late in the season ; early April (later than Forelle)
- Growers will be licensed and limited with hectares allocated and micro climates that will produce quality fruit and promoting the product to the benefit of all the stake holders
