

IQ Berries (Australia) Variety Profile MegaCrisp (F111-519)

Blueberries

Blueberry type: Southern Highbush

Key attributes: F111-519 has been exclusively released to TopFruit as a commercial selection to be planted in most regions south of the equator. This very low chill variety has large, firm, flavorful berries with very good production potential. This is an early to mid-season variety.

Chilling Required: Low chill (-150h < 7.2C)

Flowering: Flower bud break May-June.
PDF = 85 Days

Pollinator: Shows signs of parthenocarpy, but bees and proximity of a cross pollinator variety is advised.

TopFruit

MegaCrisp (F111-519)

- Harvest:** Early to mid-season production: August – September in warm regions. Western Cape: August – October.
- Plant Vigour:** Upright with very vigorous growth.
- Yield:** Very good (18-25 ton/ha)
- Berry size:** Large size fruit (1.8-2.5 g/berry), ranging between 15-25mm
- Fruit shape:** Round
- Bloom:** Strong; light blue
- Picking Scar:** Very easy picking due to long fruit stems. Small dry scar.
