

TP15-41 / EDEN™

*Pear
Fruit*

- An early season pear with extremely low chill requirement and superb eating quality.
- This variety originates from the Ben-Dor breeding programme known for the ability to test in low chill production regions. This pear should be on the radar of all potential growers of pears.
- EDEN™ is being tested by the independent evaluation company, Provar where it has achieved high scores in several criteria.

Tree

Chilling	Extremely low
Vigour	Intermediate
Growth habit	Basitonic
Full bloom	Early to third week September
Bearing habit	Terminals and laterals
Production	Medium to high

Disclaimer: This variety is not yet on the Variety List and this is not an offer for sale

 TP15-41 / EDEN™

Fruit

Harvest	Late January to late February
Mass	210g
Shape	Turbinate, obovate-acute-pyriform
Skin colour	Yellow when ripe, with a low percentage of fruit with light blush
Lenticels	Conspicuous
Flesh colour	White
Taste	Sweet, low acid and juicy. The excellent eating quality is the reason for this varieties' commercialisation
Texture	A unique “exploding” crunchy texture that remains through all storage stages, including a retailer’s shelf
Storage ability	Excellent, with no storage disorders noted in trials. Scuffing and bruising does occur

EDEN™ is a low chill variety with several production friendly characteristics and excellent storage capabilities, but primarily it should be considered because of the excellent eating quality.

This variety is currently marketed under the brand EDEN™ with a licence required for export . No distinction is made between blushed and yellow fruit as the focus of the marketing effort is the flavour profile and eating quality. Market acceptance is high with demand for greater volumes.

Please go to <https://app.culteva.pro/report-share/fw7nT0AOc4LKJq9FZRp5Q0pE8buZS6RjIHApS40tflpDhyT1LrqJSXDSSZtcHaEG> for the full Provar report.

If you are planting a pear block, we advise you to plant about 15 trees to have a bin of fruit with which you can appraise yourself of the merits of planting EDEN™ pear commercially.
