

CIV323 / Isaaq™

- Developed by Consorzio Italiano Vivaisti A.R.L. near Comacchio, Italy. Management is by KIKU™ variety management. Parentage consists of Galaxy and the selection A3-7.
- This is a snack apple giving smaller sized fruit.
- It is characterised by an intense red to purple red overcolour which covers a large proportion of the fruit including into the core of the tree.
- It has scab resistance.
- The vigour is medium with an open basitonic to spreading growth habit and good branching density.
- It has good flavour with an acidic note.
- The storage is excellent and especially the shelf life lends it to being placed near till points in retail stores.
