

EARLY SWEET™ (GRAPAES)

Features:

Type:	White Seedless
Harvest time:	Very early
Taste:	Neutral
Texture:	Firm
Berry size:	20-22 mm and oval
Fertility:	Average

Cultivation:

Pruning:	Spur
Thinning:	Apply 1-2 ppm GA at set. In difficult conditions, a second application of GA can be applied in combination with 1% low-biuret urea
Sizing:	Apply 10-20 ppm GA at 8-10 mm
Crop load:	56 000 bunches/ha
Bunch size:	Shorten to a scissor's length after set (80-90 berries/bunch)

General:

- Strong early vigour essential (min. 90 cm shoot at flower)
- Shot berries and uneven berries may be a problem

Table Grapes
